ADDRESS

TO THE

Nervous and Debilitated,

Whose sufferings have been protracted from hidden causes, and whose cases require prompt treatment to render existence desirable; If you are suffering, or have suffered, from involuntary discharges, what effect does it produce upon your general health? Do you feel weak, debilitated, easily tired? Does a little extra exertion produce palpitation of the heart? Does your liver, or urinary organs, or your kidneys, frequently get out of order? Is your urine sometimes thick, milky or ropy, or is it ropy on settling? Or does a thick scum rise to the top? Or is a sediment at the bottom after it has stood awhile? Do you have spells of short breathing or dyspepsia? Are your bowels constipated? Do you have spells of flushing, or rushes of blood to the head? Is your memory impaired? Is your mind constantly dwelling on this subject? Do you feel dull, listless, morning, tired of company, of life? Do you wish to be left alone, to get away from everybody? Does any little thing make you start or jump? Is your sleep broken or restless? Is the lustre of your eye as brilliant? Is the bloom on your cheek as bright? Do you enjoy yourself in society as well? Do you perform your business with the same energy? Do you feel as much confidence in yourself? Are your spirits dull and flagging, given to fits of melancholy? If so, do not lay it to your liver or dyspepsia. Have you restless nights? Your back weak, your knees weak, and have but little appetite, and you attribute this to dyspepsia or liver complaint?

Now, reader, self-abuse, venereal diseases badly cured, and sexual excesses, are all capable of producing a weakness of the generative organs. The organs of generation, when in perfect health, make the man. Did you ever think that these bold, defiant, energetic, persevering, successful business-men are always those whose generative organs are in perfect health? You never hear such men complain of being melancholy, of nervousness, of palpitation of the heart.

How many men, from the effects of excesses, have brought about that state of weakness in Sexual Organs that has reduced the general system so much as to induce almost every other disease—biliousness, dyspepsy, paralysis, spinal affections, suicide and almost every other form of disease which humanity is heir to, and the real cause of the trouble scarcely ever suspected, and have used remedies for all but the right one.

Diseases of these organs require the use of a Diuretic. HELMBOLD'S FLUID EXTRACT BUCHU is a great Diuretic, and is a certain cure for diseases of the Bladder, Kidneys, Gravel, Dropsy, Organic Weakness, Female Complaints, General Debility and all diseases of the Sexual Organs, whether existing in Male or Female, from what ever cause originating, and no matter of how long standing.

If no treatment is submitted to, Consumption or Insanity may ensue. Our flesh and blood are supported from these sources, and the health and happiness and that of posterity, dependupon prompt use of a reliable remedy.

HELMBOLD'S

Fluid Extract Sarsaparilla,

The Great Blood Purifier and Beautifier of the Complexion.

HELMBOLD'S

EXTRACT SARSAPARILLA

WILL RADICALLY EXTERMINATE FROM THE SYSTEM SCROFULA, SYPHILIS, FEVER SORES, ULCERS, SORE EYES, SORE LEGS, SORE MOUTH, SCALD HEAD, BRONCHITIS, SKIN DISEASES, SALT RHEUM, TUMORS, RUNNINGS FROM THE EAR, WHITE SWELLINGS, TUMORS, CANCEROUS AFFECTIONS, NODES, RICKETS, GLANDULAR SWELLINGS, NIGHTSWEATS, RASH, TETTER, HUMORS OF ALL KINDS, CHRONIC RHEUMATISM, DYSPEPSIA, AND ALL DISEASES THAT HAVE BEEN ESTABLISHED IN THE SYSTEM FOR YEARS.

Being prepared expressly for the above complaints, its Blood-Purifying properties are greater than any other preparation of Sarsaparilla. It gives the complexion a clear and healthy color, and restores the patient to a state of health and purity. For purifying the blood, removing all chronic constitutional diseases arising from an impure state of the blood, and the only reliable and effectual known remedy for the cure of Pains and Swellings of the Bones, Ulcerations of the Throat and Legs, Blotches, Pimples on the Face, Erysipelas, and all Scaly Eruptions of the Skin, and Beautifying the Complexion.

HELMBOLD'S

CATAWBA GRAPE PILLS

Are purely vegetable, being composed of

CATAWBA GRAPE JUICE

AND

FLUID EXTRACT RHUBARB

Beware of those cheap patent pills, carelessly prepared by inexperienced persons—vended in wooden boxes—most of which contain either calomel, mercury, or other deleterious drugs.

LETTER FROM ENGLAND.

THE "BLACK COUNTRY."

BIRMINGHAM, Aug. 30, 1871.

To the Editor of the Whig and Courier:

All travellers from Liverpool to London must pass through what is called the "Black Country," the region of coal, iron and soot.—The different towns and parishes so run into each other, that it seems to be one continuous settlement of low, dingy brick houses, with towering chimneys everywhere belching out fire and smoke. The clangor of workshops, forging chains, anchors, rails and everything made of iron the sweltering masses whose life mission is to smelt and puddle iron beside immense furnaces; the promiscuous mingling of men, women and children in the cyclopean work, all impress a stranger with the vastness of England's industry. Of the "green borderland" of this Black Country, Birmingham is situated. The coal and iron have made the center of this island what it is, and countless canals railroads, pits, revolving wheels, and the mountains of *debris* from the mines, which cover all the surface and make it a desert, give a key to the amount of treasure which has been for generations extracted from the bowels of the earth. Amid all this the question arises concerning the continuance of these supplies, and the government has been investigating the subject. Exhaust the coal and iron and the prosperity of England must be blighted, and her chief industries destroyed The report of the Committee shows that the amount of available coal is 91,207,000,000 tons and the estimated time required to exhaust this inconceivable aggregate is calculated to be from 110 years to 400 years. It is often said that this will go beyond our time, and hence there is no reason for concern, but it is not so regarded by the more thoughtful. A nation which dates back her history, prosperity and greatness for a thousand years, cannot ignore the failure of her chief resources in one or four centuries of the future. All this central part of the country would be without support and almost valueless if coal and iron failed, and those who fondly hope that the rule of Britannia may never wane, can not cast the horoscope of the future without anxious inquiries as to the prospects of the proud nation. When another half millenium shall have passed, there can be no doubt that nearly all these industries will have been transferred across the ocean, where the resources will be found abundant for ages.—America can afford to wait a little, when it is remembered how slow has been the process of nation building heretofore, and that she is not yet in her youth even, but in her early childhood.

THE BREWERIES.

An especial branch of England manufacturing is found on the borders of this black country, and, though seemingly unassociated with the former, is most intimately connected with it. It serves to keep up the steam in the human engines, as water supplies the necessities of the iron motive power.

Through all this region every one has his beer jug, and it is marvellous how much these people hold. They can drink all day and all night, and then call for more beer.—Burton on Trent is the place selected for the supply of malt liquors for the nation, and a town of fourteen thousand inhabitants has been built up entirely by this trade. The two leading firms are Allsops and Bass, with a score of others of less note. Each of these two firms covers about forty acres with its works, and together, they send out eighty millions of gallons of beer annually. The other firms produce as much more, making an aggregate of one hundred and sixty millions gallons per year. The stock of hops and grain is beyond all comprehension, and leads to the exclamation, "for what purpose is all this waste!" this might have been sold for much and given to the poor." As it is, it only makes the poor, poorer, and breeds crime, suffering, and wretchedness. At Allsop's the one item of barrels which are a kind of rolling stock, and are sent out full and returned empty, numbers 500,000 and cost an aggregate of $1,700,000. This being but one-fourth the number for the whole trade it follows that the barrels alone for the beer market are valued at $6,800,000. The waters of the river Trent are not used for brewing, as is usually supposed, for deep wells are bored in the vicinity, and the water is so affected by certain elements through which it passes, as to surpass all other supplies for the purpose.

THE BEER DRINKERS.

As there are small breweries all over the country, probably not more than one-half the beer of England is brewed at Burton, making 320,000,000 gallons for the nation. This gives sixteen gallons for every man, woman and child, omitting Scotland and Ireland where whiskey takes the place of beer. By the time this stimulant reaches the consumer it costs an average of fifty cents per gallon, amounting to the snug little sum of $160,000,000 guzzled by the people of England in the shape of beer. The chief manufactures have become immensely rich, and luxuriate like princes of the realm. The United Kingdom Alliance are battling against this state of things with great vigor, the chief article of their creed being the passage of a Permission Bill, allowing the closing of liquor shops when *two-thirds* of the voters so decree. Though they have made great advancement, the Alliance is yet a long way from success, and must toil earnestly and patiently for many years before their wishes are realized.

But all criticism aside, Great Britain impresses a visitor, more and more, that she is a great nation. Great in power; great in wealth, great in industry. She lacks but temperance and general education to make her almost a model nation. These two things which she lacks would soon break down the dividing walls of society and elevate the poor to respectability and comfort. J. E. G.

The total loss by the fire at Pioche, Nevada, is estimated at $600,000. There is a large interest in the list of persons wounded by the disaster.

A LESSON IN EQUINE NAVIGATION. The Providence Journal gives an incident of the recent demonstration in that city, upon the dedication of the Soldiers' and Sailors' monument. It says many a tedious march has been enlivened by the witty remarks or pointed jest of our "Boys in Blue," as they tramped along making the best of their lonesome job, and by none were they relished better than by the officer against whom they were directed, provided he was man enough to take a joke and not be offended. The days gone by were forcibly recalled, last Saturday, when one of our Generals and Assistant Marshals, having occasion to carry an order from his chief, attempted to turn about by pressing the bridle rein against the neck of his horse, forgetting for the time that his steed had not been trained to come about in that way, and to consequence was describing a circle that excepted the larger part of the route, when he was hailed by one of his old comrades in the ranks with "Put a centre-board in him, General."

THE DIFFERENCE.

No one denies that the two great political parties which embrace the voting population of our country merely present the common level of crime by individual members of the organization should be held responsible for the acts of the party as a whole. Bad men are often found in the ranks of certain political organizations, but the public regards the party as responsible for the acts of its members. The recent exposure of stupendous robberies of the Tammany leaders of the Democratic party and the discovery of the defalcations of several officers of the Republican administration, afford important points for comparison of the different attributes claimed by the two parties as such to their guilty members as well as the distinguishing and instructive lights in the encouragements of the Government of guilty officials.

The enormous robberies of the Tammany rings recently made public, though in their aggregate exceed the amounts of the minor items of the Tammany frauds and peculations in comparison with the gigantic New York robberies, nevertheless, serious crimes against the rights of the people and deserving of the severest reprehension. The announcement of these defalcations was promptly published by the Republican press throughout the country, and measures were taken to bring the offenders to justice. No attempt has been made to screen them or to conceal their political affiliations. The Republican party has unhesitatingly denounced the corruption in every detail of intelligence bearing upon the case, has published it without reserve or mutilation, has at once instituted the necessary steps to set the machinery of the law in motion against the guilty, and has been untiring in its efforts to expose the rascality and bring the criminals to justice. Throughout the whole affair the Republican party has been awaiting its trial, for which the Courts have been promptly organized and everything which could demonstrate the purpose of the Republican administration to bring official delinquents to punishment has been done at once and without political influence. We remember here that these defalcations were discovered while the Republican party was in power, and that the prosecution has followed swiftly in the wake of possibly the most unfortunate occurrence that could have happened to the party. The regretted event could not be concealed, and the Republican party has presented by the press and the public with a full opportunity for instant and thorough vindication of its own honor and that of the people it represents.

How different has been the course of the Democratic party and its press! Instead of the public exposure and punishment of the offenders, or deserving the full measure of justice or penalty assumed their defence. The recent exposure of stupendous robberies of the Tammany leaders of the Democratic party and the discovery of the defalcations of several officers of the Republican administration, afford important points for comparison of the different attributes claimed by the two parties as such to their guilty members as well as the distinguishing and instructive lights in the encouragements of the Government of guilty officials.

The regretted event could not be concealed, and the Republican party has presented by the press and the public with a full opportunity for instant and thorough vindication of its own honor and that of the people it represents. It could not have done more in vindicating its own honor and that of the people it represents.

In turn to the conduct of the Democratic press in reference to the whole robberies in New York, we see a very different picture. The existence of great frauds under the Tammany Democracy in New York is well known for years. The Times has before upon its columns which have been the guilt by express name with the offenders, or deserving of justice or penalty assumed their defence. The recent exposure of stupendous robberies of the Tammany leaders of the Democratic party and the discovery of the defalcations of several officers of the Republican administration, afford important points for comparison of the different attributes claimed by the two parties as such to their guilty members as well as the distinguishing and instructive lights in the encouragements of the Government of guilds recent wide public, though in their aggregate exceed the amounts of the minor items of the Tammany frauds and peculations in comparison with the gigantic New York robberies, nevertheless, serious crimes against the rights of the people and deserving of the severest reprehension. The announcement of these defalcations was promptly published by the Republican press throughout the country, measures were taken to bring the offenders to justice. No attempt has been made to screen them or to conceal their political affiliations. The Republican party has unhesitatingly denounced the corruption in every detail of intelligence bearing upon the case, has published it without reserve or mutilation, has at once instituted the necessary steps to set the machinery of the law in motion against the guilty, and has been untiring in its efforts to expose the rascality and bring the criminals to justice. Throughout our state campaign the Democratic papers of Maine, while insisting that the affairs of New York city concerned no one except its citizens, have steadily sought for Tammany, ignoring the testimony of honest journals and men of their own party, and persistently impressing their readers with the belief that the whole affair was simply a Radical expedient of vile sundry defalcations in their own which were only limited as to a dark and mysterious way. There could be excuse of ignorance, no plea of misunderstanding, for the utterances of unimpeachable Democrats had been scattered broadcast through the Republican press and the denunciation of the ring by such men as Roosevelt Havemeyer and many others, could leave no doubt of the damning guilt of the leaders against whom they were forced to revolt. There is no explanation save that conception of party fealty which demands the championship of political associates without regard to character or conduct. It would be impossible to find a stronger contrast than is presented by the action of the Republican and Democratic parties in this respect, and the lesson will not be soon forgotten by the people.

As instances of the systematic efforts of the Democratic press to screen the Tammany rascals from the effects of the most startling exposures, we note that the Bangor Democrat, published on Thursday with a record before it of the developments which have excited the whole country during the past week has no word of condemnation of the events transpiring in New York. The Boston Post, claiming to be a leading newspaper of that city in its issue of Thursday on which day we find several columns of important articles concerning the existing corruptions in New York cut out the entire report of the Tammany contest and gave not a line of information in its telegraphic or other columns indicating any unusual occurrences in the metropolis. The Belfast Journal issued in the same day devotes a column of editorial matter in an effort to prove that it is unpertinent for the press to discuss New York affairs, and while refusing to admit that wrong has been committed declares that the accusers have as yet been unable to bring evidence of their charges, and it is believed that they will be unable to do so. It instructs its readers that there is a very general belief among Democrats that the noisy and loose charges made against the officials of New York city, have been mainly for the purpose of diverting attention from the enormous robberies in every department of the national government that Hall and Connolly are publicly branding each other as guilty of even more than has been charged, this Democratic paper complacently remarks that "all Democrats will refuse to accept the mere sleuth hound theories which are gotten up for effect from time to time," it briefly announces the appointment of Gen. Hall the declination of McClellan, without explanation, and then goes before the public with its views of events which are attracting the attention even of the press of Europe.

The Democratic papers of Maine as well as those of other States, have made up their own record on this matter and they cannot escape the responsibility thus assumed. We have held that the exposure of the enormous corruptions in New York is a matter of interest to every section of the country and if the Democratic press adheres to the championship of the Tammany ring, it becomes so in a double sense—politically as well as morally. The people of New York have thus far given evidence of ability to overthrow the municipal brigands who have wielded such immense political power, the people of the whole country must be on guard against the political party whose journals have evinced such eagerness in their defence of the corruptionists.

The following is the substance of the programme reported by the Special Committee of the Bangor City Council, for the reception of President Grant in that city on the opening of the E. & N. A. Railway in October. It is rather a cheap affair, and is not becoming such a city as Bangor, or such a corporation as that of the E. & N. A. Railway Co., which has received such munificent gifts from the State. We notice that an appropriation of $3,000 is proposed by the Common Council of Bangor for carrying out this programme. Who, let us ask, is to have the pickings and stealings?—for there must be a large balance left after the bills for such a programme as this etc.—[Portland Press.

The Press misapprehends. The sum proposed by the Common Council was intended for a different programme from that published, and our citizens will not endorse any pickings or stealings proceedings. It is unfortunate that petty controversies in our City Boards should become the subject of comment elsewhere, but those who have hitherto experienced the hospitalities of Bangor may rest assured that our *people* will see to it that the President of the United States is received and entertained in a manner suited to his high station and worthy of the reputation of our city. Red tape will not be allowed to confine the liberality of our citizens nor that of the corporation which is to be honored by the presence of the Chief Magistrate, upon the formal completion of its great enterprise.

TERRIFIC STORMS ON THE BAHAMAS.—A general statement has been received of the effects of the recent storms on the Bahamas. The gale or succession of gales was terrific, the storm shifting from northeast to the southeast and the whole coast and islands are strewn with wrecks from which much valuable property and many lives have been destroyed. Sweeping through the island of Abaco, the storm completely divided it into two islands carrying off with it no one a large number of the inhabitants. A large amount of property was also carried away and probably buried in the sea. The ripe fruit crops of the various islands comprising the group have been entirely swept away, and it was found impossible to get a cargo—Nothing remains of the orange or banana crop but a very young growth, and the trade in these fruits has been very seriously disturbed.

A newspaper in this State which it is unnecessary to name, thus unkindly rebukes one of its own pupils, and checks the aspirations of a possible future rival:

"We will pay a man Home reward for the detection of the boy that wrote obscenity on the walls of the stairway leading to the office. If discovered, he will find it an expensive piece of amusement."

POLITICAL AND PERSONAL.

Henry Ward Beecher spoke at a meeting of the Congregational College in Montreal Wednesday evening.

The Republican primaries in Kings county, N. Y., Thursday night, resulted in the Greeley wing securing two thirds of the delegates.

Secretary Belknap, General Sherman, and General Humphreys were in New York Friday, to inspect the military posts in that locality.

The Mayor of Portsmouth, N. H., has suspended the City Marshal, charging him with lying and stealing. The Marsha threatens to sue for damages.

The Union Republican delegates to the State Convention at Syracuse, met in New York city Wednesday evening and resolved to assert that they were the regular and proper represen atives of Republican voters of that city, and to submit to no action of the Convention that would not substantially recognize this claim.

UNITARIAN ANNUAL CONFERENCE.

The Annual Conference of the Unitarian churches of Maine met in Farmington on Tuesday, the 19th. In the evening a sermon was preached by Prof. C. C. Everett, of Cambridge, Mass. After a devotional service on Wednesday morning, the Conference came to order at 9½ o'clock, F. M. Sabine, Esq., of Bangor, President, in the Chair.

The following officers were chosen for the ensuing year —

President—F. M. Sabine, Esq., o. Bangor.

Vice President—Rev. J. T. G. Nichols, of Saco.

Secretary—Rev. A. D. Wheeler, of Topsham.

Recording Secretary—Rev. C. C. Vinal, of Kenduskeag.

Executive Committee—Rev. B. H. Bailey, Portland, Hon. John D. Hopkins, Ellsworth, Dr. Sheldon, Waterville.

Missionary Committee—Rev. C. Palfrey, D.D., Belfast, Franklin Muzzy, Esq., Bangor, Rev. William H. Savary, Ellsworth.

Committee on Ways and Means—Rev. A. D. Wheeler, Topsham, Judge Belcher, Farmington, Hon. A. E. Stevens, Portland.

After the Secretary had read his report on the condition of the Unitarian churches of the State, a motion was introduced to instruct the Secretary to call Local Conferences when he thought it expedient.

An interesting discussion on Missionary Effort followed, by Messrs. Wilson of Lamoine, Bailey, Savary, Vinal, and Nichols—Rev. Mr. Nichols read an able and suggestive essay on "Christianity, an Influence in the World."

In the afternoon, Rev. Mr. Shippen, Secretary of the American Unitarian Association, made a statement of the work of that body. Rev. Dr. Sheldon preached an able sermon in the evening on "What it is to preach Christ." The Lord's Supper was afterwards administered by Rev. C. C. Vinal, of Kenduskeag.

On Thursday, after a devotional service by Rev. Mr. French, of Brunswick, the Conference listened to an essay from Rev. Mr. Savary, on the "Revelation of the Father in Jesus, which was followed by an earnest discussion of the relations of Science and Faith.

The Conference adjourned *sine die* at noon.

The meetings were characterized by an earnest, devotional spirit, and the reports were most encouraging to those interested in the spread of Unitarianism as evidenced in the building of new churches and the increase of converts. The hospitality of the people of Farmington was unbounded. Their church edifice is not quite finished but soon will be under the vigorous exertions of their young and able minister, Rev. Charles Hayden.

RESCUE OF WRECKED SEAMEN. The captain of the ship Bogota just arrived at San Francisco from Liverpool, reports that on the 19th of July when running through the Straits of Le Mere, he saw the American ensign flying Union down from the summit of a snow capped mountain. He stood in and took off the captain and twenty two men and officers of the American ship Italia wrecked on Terre del Fuego, July 10th. The Italia was from Rio Janeiro bound for Valparaiso.

THE GREELEY-MURPHY QUARREL.—The quarrel between the Conkling and Fenton wings of the Republican party in New York, bids fair to ruin the otherwise favorable prospect of redeeming the State. Greeley is now berating Collector Murphy in the most violent manner. The Tribune of Friday accuses Murphy of defrauding the government of $112,000 in filling contracts for hats and caps, and cites committee reports and affidavits in support of the charge. In a bitter editorial it declares that Murphy deserved to be sent to Fort Lafayette, and uses the following vigorous language:

This shoddy contractor, swollen with robberies from our soldiers, and backed by all the power of the administration that has been easily trusted him, has had his clutch on the throat of the Republican party in New York long enough.

Wilfred & Shaw's cotton mill at Carding ton, seven miles from Philadelphia, was burned on Thursday, and Wheatley's mill, at the same place, was also destroyed by fire.—Loss $150,000.

Incendiaries attempted, Thursday morning before daylight, to burn Virginia City, Nevada. Rags saturated with kerosene were ignited in several places simultaneously. The attempt was unsuccessful.

For Hand and Machine Sewing,

and has been thoroughly introduced in certain localities, and is being introduced everywhere it possesses four great requisites for a perfect Thread, viz SMOOTHNESS, ELASTICITY, UNIFORMITY OF TWIST, GREAT STRENGTH.

These results are secured by a liberal use of SEA ISLAND COTTON, and the expensive process of Combing whereby the short fibres of Cotton are removed, and by important improvements in machinery, some of which are patented and used exclusively by the Williston Mills who were also the first to introduce cotton combers in this country. With this Thread the operator on the sewing machine can accomplish more and better work than with the ordinary article.

In many instance it is being substituted for Silk and Linen with entire satisfaction to the consumer. We buy a little machine to test the strength of Thread, and all who will call can see that the Williston Thread has greater strength than any other in use.

Over-doctored.

Without any disrespect to the members of the medical profession, a profession honored by all thinking men, it is only just to say that they are too thick on the ground. The consequence is that the community is doctored over much. When nature needs only the gentle stimulant and alterative, which has become famous throughout the country as a reliable medicine, under the name of Hostetter's Stomach Bitters, she is not unfrequently fixed with a dozen prescriptions, all experimental, from the Pharmacopœia. This is an evil, and, proves that the practice of medicine is far from being at all times a healing art. At this period of the year, when the fall of the leaf indicates that decay has seized upon the vegetable kingdom many harassing diseases are prevalent. Chief among these may be mentioned intermittent fever and bilious remittent. The exhalations rising from decomposing vegetation and the heavy dews and fogs, are very apt to generate these complaints. The wisest policy is to protect the system by a course of Hostetter's Stomach Bitters at the commencement of the fall. Much suffering may thereby be avoided. But if the disease has already begun, its periodical visitations may readily be checked and broken up by this genial, yet harmless vegetable tonic.

But be on your guard against the charlatans who are attempting to palm off, under various names, unwholesome compounds, which they pretend to compare favorably with the great national remedy which has long since swept more formidable opposition from the field. Bear in mind that every bottle of genuine Hostetter's Stomach Bitters is accompanied by a splendidly engraved label, bearing the name of the firm manufacturing it, put up in bottle only, and cannot be obtained in bulk.

WALKER'S

IMPROVED

PORTABLE RANGE.

THE NEW RANGE excels anything of the kind ever offered for sale. It requires much less space than ordinary cooking stoves, and is more economical. It will heat as much water as a range set in masonry.

The HOT CLOSET retains the heat usually radiated from the bottom, which is, during the summer months WORSE THAN WASTED, there by not only SAVING FUEL, but making the KITCHEN MORE COMFORTABLE, besides furnishing an admirable place for warming and keeping food warm, warming plates, &c. The door can be removed during cold weather to allow the heat to escape into the kitchen.

Cons are separated from the ashes in the SIFTING CHAMBER.

THE FOLDING SHELF, together with other improvements referred to, make it all we claim for it, viz: THE MOST DESIRABLE COOKING APPARATUS TO BE FOUND ANYWHERE.

The Cause and Cure of Consumption.

The primary cause of Consumption is derangement of the digestive organs. Indigestion produces a dyspepsia and a dyspeptic is a walking mass of corruption, which in the form of the bile is thrown into blood and thence into the tissues of the body. Every healthy person is supplied from the food he eats with a certain amount of albumen, or white of the egg, which is the principal element in the blood. If this albumen is not perfectly assimilated, it will be very liable to form Consumption. Many persons are living with diseased lungs, the result of Consumption without their knowledge. Consumption is not generally indicated by a cough, but by a wasting away of the flesh. The patient is not conscious that the lungs are diseased, but gradually loses strength, and becomes emaciated. Nine tenths of consumptives' lungs are a mass of sores which in most cases of stomach trouble will inflame. The ground or floating particles of which consumption originates, are inhaled with the breath, and if provoking, it as many of the healthy do. An inflamed throat, which is caused by the patient being exposed to the biting blasts of winter or the chilling winds of spring or autumn. It should be cared for shielded from all irritating influences. The utmost caution should be observed in this particular, for without it a cure under almost any circumstances is an impossibility.

The person should be kept in a wholesome and nutritious diet, and all the medicines continued until the body has been restored to its the natural quantity of flesh and strength.

I was myself cured by this treatment of the worst kind of Consumption, and have lived to see and hear of many others cured by this same means, and now, after a long, nearly lapse I have cured thousands since, and very many have been cured by this treatment whom I have not seen.

About the first of October I expect to take possession of my new building at the northeast corner of Sixth and Arch streets where I shall be pleased to give advice to all who may require it.

Full directions accompany all my remedies so that a person in any part of the world can be readily cured by strict observance of the same.

VERDICT.

EFFORTS TO OBSTRUCT THE INQUIRY.

Report that the Mayor is to be arrested.

MASS MEETING OF TWEED'S RETAINERS.

THE VOUCHER BURGLARS—GARVIN REFUSES AID.

NEW YORK, Sept. 22.

District Attorney Garvin has refused the request of the Com. of 70, that Wilkins Current be allowed to assist him in behalf of that committee in the prosecution of Mr. and Mrs. Haggerty and Bausch, before Justice Dowling this morning. Garvin says that he can conduct the case very well upon the evidence of the Com. of 70, and that it would be ridiculous to allow outside parties to participate in a case of this kind.

POLICE COMMISSIONER AND AN ALDERMAN IMPLICATED.

It is rumored that Judge Ledwith had issued a warrant for the arrest of police Commissioner Henry Smith on the charge of instigating the robbery of vouchers as insinuated in Mary Conway's affidavit. The police are unable to find Smith. The bundle of vouchers taken from the Court House into Tweed's room can be used to convict Alderman Murray's, on the corner of Anthony and Sullivan Sts. Some of the burnt papers found in a deserted room of the Court House, show the writ of replevin, and the evidence against Haggerty is now considered complete. The pieces of burnt Records have been secured to decipher the writing on the partially carbonized papers.

ATTEMPT AT AN "ALIBI."

The friends of Haggerty will attempt to prove that he was at Greenwich, Conn., when the robbery was committed, but if Judge Dowling orders his discharge the opponents of Tammany intend to have him indicted.

MAYOR HALL TO BE ARRESTED.

It is generally believed that Mayor Hall will be the first of the ring to be arrested, as sufficient evidence has been secured, proving that many of his friends have been placed upon the monthly pay roll of the city.

ONE OF THE FRAUDULENT CLAIMS.

Among the vouchers taken from the Comptrollers office by the late Auditor Watson, was one showing that G. J. Schuyler was paid $86,000 for lumber. Mr. Schuyler publishes a card this morning stating that he received only $45,000, and got that through a third party to whom he assigned his claim, after repeatedly failing to get his money.

BOARD WILL NOT CONVENE UNTIL IN SESSION.

GATURE.

Governor Hoffman yesterday stated that he had no intention of calling an extra session of the Legislature on account of the municipal troubles in this city.

THE TWEED RALLY.

Great preparations are being made for a demonstration in favor of Tweed this evening. The platform erected for speaking is the largest ever erected for that purpose in this city.

THE BURGLARS IN GUILE.

Later—The examination of Haggerty and Bausch, charged with the robbery of the Comptroller's office commenced this morning before Judge Dowling. The crowd was large and the excitement great. John Graham, counsel for the prisoner, made application that counsel for Haggerty and now join Mrs. Haggerty with the other defendants in the case. Judge Dowling refused. Mr. Graham then moved for a habeas corpus, which motion was argued. Judge Dowling said he had no power to grant the motion.

VOUCHERS FOR $12,000,000.

Amos C. Lyons, County Auditor, testified that the vouchers were in the Comptrollers office on Saturday evening 9th inst. He examined them on that day and thought they covered payments of about $12,000,000.

JUDGE LEDWITH AND THE SHERIFF.

The examination of Mrs. Haggerty before Judge Ledwith, on account of the absence of her counsel, John Graham, was postponed until afternoon. The fact that Sheriff Brennan held a long interview with Judge Ledwith this morning is considered very significant on account of the well known hostility between Judge Dowling and Sheriff Brennan.

Mayor Hall had not appeared at his office at 1 o'clock this afternoon.

More fragments of burnt vouchers were discovered this morning, and have been secured by Comptroller Greene.

HALL IGNORES THE COMPTROLLER.

Mayor Hall has paid no attention to the letter Comptroller Greene sent him this morning asking that the Board of Supervisors be convened at the earliest possible date, to receive a communication from the departments relations to the tax levy of the year of 1871.

GETTING OUT OF THE WAY.

Joel A. Fithia, son-in-law of Comptroller Connolly and Commissioner on street openings and Broadway widening, and Assistant Receiver of taxes has determined to resign.

THE CASE ADJOURNED.

William Murphy, night watchman, Deputy Comptroller Storrs, Mary Conway and Chas. O'Connell, the latter from whom was in the Controller's office until 2 o'clock Sunday morning, testified, but no important facts in addition to those published in the affidavits were elicited. The examination was then adjourned until Monday, Judge Dowling refusing John Graham's request for the release of Mrs. Haggerty, on the ground that he could not interfere, the woman being in custody of Judge Ledwith.

HALL COMES TO TIME.

Mayor Hall has called a special meeting of Supervisors for Monday in obedience to Deputy Controller Green's request, for action on the tax levy.

FROM WASHINGTON

WASHINGTON, Sept. 22.

About 7,500 claims have been indexed by the Southern claims Commissioner. The amount of alleged damages claimed being upwards of twenty millions of dollars owing for stores of supplies, etc. by U. S. troops belonging to those claiming to have been Union men during the late war; evidence has been taken in 650 cases, and a decision has been arrived at on 150 of them. The Commissioners have the remainder of them under charge. It is expected that they will report at the next session of Congress 300 cases with their decisions thereon, together with testimony as required by law. Additional evidence is being taken by special commissioners in some of the Southern States, and it is possible that the commission sitting in Washington will resume taking testimony about the first Monday in October.

Gov. Alcon of Mississippi, has arrived here and he entered to-day of the Agricultural College, soon to be located by the State of Mississippi. He will resign his Governorship, and take his seat as U. S. Senator at the next session of Congress.

The Commissioner of Internal Revenue decides that the interest on the new funded loan bond of 1881, is not to be included in the returns for taxation in computing the government tax of two and a-half per cent. on the net earnings of bonds.

TELEGRAPHIC.

SPRINGFIELD, Mass, Sept. 22.

The Republican City Caucus to-night, was large and boisterous to an unprecedented degree. It was evident from the start that the majority of those present were Butler men. At the outset they refused to sustain the rules to prevent fraud established by the Republican City Committee, and elected a chairman by acclamation. They also refused to use check lists in balloting, but fearing a bolt, afterwards agreed to the list with a proviso that all who called themselves Republicans should be allowed to vote, whether their names were on the list or not.

The ballot then proceeded, but through the incapacity or negligence of the chairman and tellers, who paid no attention to the rules 1,200 votes were cast, while only 100 names were checked. Several hundred anti-Butler Republicans refused to vote at all, while hundreds of Democrats and labor reformers voted unchallenged, and there were numerous cases of repeating. The vote stood 800 for Butler against 407 for the anti-Butler ticket. The Republicans denounced the vote as a fraud, but whether a rival delegation will be sent to the State Convention is yet to be determined.

BOSTON, Sept. 22.

The whole number of delegates elected up to a late hour this evening at the Republican Convention in Worcester, is 785; for Butler, 302. anti-Butler, 483.

EXTENSIVE FIRE.

St. JOHN, N. B., Sept. 22.

The block bounded by Charlotte Union and Lynde streets in this city, was burned this morning, and the Fountain, Crawford, North American and New Brunswick hotels, with several stores, were destroyed.

SECOND DISPATCH.

A fire broke out in a rag off in the centre of wooden buildings between King square and Union street this morning about one o'clock, and consumed 25 liquor, grocery and provision stores, the Fountain House, Provincial Hotel, North American House, Carleton House, Union Hotel, Hamm's extensive stables, and several work shops. The Park Hotel caught in the roof and part of the cupola was burned off and the interior was drenched with water. Only 12 buildings, all of them badly damaged, are left on the square. Loss $100,000.

The insurance is $50,000, most y in foreign companies.

RAILROAD ACCIDENT.

HUDSON, N. Y., Sept. 22.

The Saratoga special train on the Hudson River Railroad, due in this city at 6.20 this evening, ran into a coal train of the Hudson & Boston Railroad, at the crossing of the Hudson River Railroad. The engine and tender of the Hudson River train was demolished, and the baggage car badly damaged. One coal car was cut in two and the train which train was thrown from the track. No person was injured. All trains both ways were delayed three or four hours. The accident occurred through disobedience of the rule, which requires all trains to come to a full stop before crossing the tracks at this station.

DISASTERS.

Sch Mary B Reeves, for Cuba, Maloney, from Cuba for Newport, reports anchored night of 19th inside of Block Rip during a SE gale; and to prevent dragging anchor cut away the masts, which took out the spare with loss of spare boat and part of deck load; procured assistance from Chatham, and 4 fishing boats, who got the vessel in more under the land, threw out hawsers and by the aid of the steamer Vineyard-Haven towed her to Quick & Fish's Church at Woodsport.

Ship Patrick, of Bath Weeks from Leith for San Francisco, was ashore Aug 22, of Peak Grange, del Carlo, six miles south of the mouth of the river San Francisco, and the cargo nothing could be saved. On the 20th she showed fire on board, in the 2d, 3d, 4th, 5th, 6th, and the upper deck had to make for the nearest port; but the fire raged with such fearful violence that she had to abandon the vessel, taking with him the crew of 22 persons, all of whom are safe and now at the Orange. Two hours after the abandonment there was an explosion on board of the vessel scant 3 miles from it's coast. The Alexandria had a cargo of 1600 tons coal and 1400 tons of other articles. The Alexandria was 1234 tons register, built in 1868 at Bath, Me., where she was owned, and is principally insured at Boston and New York. The ship was considered one of the best vessel of her class afloat in Bath.

Sch Mary Collins, from Savannah for Boston, before reported ashore on South Breakers, was got off with loss of part of her shoe.

Sch Thomas Sept 18. The Ameer on brig, alla F Carney, is ready advised as having been towed in 6 inches properly. It is in the lower bay. Sun's floor, pork, beef and lumber has been saved from her at public auction. The floor averaged $2 50 per bbl; corn 99 being being sold; pork, $7 to $18; beef from $4 to $16. Lumber, sold in small lots, realized about $25 per 1000. The remainder of the stuff will be sold until then the hull. She is not like to be raised.

Brig Edward Everett, before reported wrecked, was from Matanzas, in ballast bound for Turks Island, to load there for Boston. The E E was owned by Messrs Nichols, Merrick & Co, and is insured for $5,000, viz: $3,000 in the Mercantile and $2,000 in the United Ins Co of Yarmouth.

Sch Oneida, from Boston for Philadelphia, before reported ashore on Hog Island Shoals, has been condemned and stripped of sails, rigging &c. Schr Jordan, Ingelow, at Calais from Boston, went ashore Aug 4 while going up the river, but was floated off without damage. She would have to go into dock for examination.

Brig Warrior before reported wrecked on St Kitts with 250 puncheons molasses on board, was bou nt to New York. The hull together with the cargo sold for $705.

MAINE BOARD OF AGRICULTURE.

FARMERS' CONVENTION.

LINCOLN, Sept. 21, 1871.

THURSDAY FORENOON SESSION.

At a special meeting of the Board this morning a resolve was passed regretting the absence of a representative of the Maine Farmer from the Convention The question of the next annual session of the Board was also taken up and discussed. The session will be held at Paris in Oxford county, about the middle of next January.

The first paper read before the Convention was on "The saving and application of manure," by Mr. Adams of Franklin county. This was throughly discussed, and the next question taken up was, what shall we do with our stubble field where the grass seed did not catch? The general idea seemed to be that it is best to sow on seed this fall, without plowing, at as late a day as possible before the ground closes up.

President Allen of the College, presented a resolve thanking the citizens of Lincoln, in behalf of the officers of the College, for the hospitalities of the occasion.

Hon. J. W. Porter of Burlington, occupied the chair during the session.

AFTERNOON SESSION.

The first subject was a paper on "Clean Cultivation," by Col. Swett of Oxford county. He strongly recommended clean culture and in hoed crops, frequent stirrings.

Resolutions were passed expressing regret at the retirement from the Board of Calvin Chamberlain Esq., of Foxcroft, who has been a member for fifteen years. Also thanking the citizens of Lincoln for their attentions and endeavors to make the session a pleasant one.

CLOSING SESSION.

The closing session in the evening was very well attended, Subject:—Fruit Culture. A collection of pears by Mr. Goodale of Saco, comprising 20 varieties, was a text for quite a lecture on pears by that gentleman. He favors standards and condemns dwarfs. He referred to the pear seedlings of Mr. McLaughlin of Bangor, as very valuable and promising varieties.

The discussion was continued during the evening, the latter part being devoted to apples. Among the speakers were Messrs. Goodale, Sweet, Hersey, Caldwell, of Sherman, Adams, Thing, Brackett and others.

After a complimentary vote to the President, the Convention adjourned, *sine die.*

PRAYER MEETING. The Young Men's Union Prayer Meeting will be held Sunday A. M. at the large vestry of the Free House, on Columbia Street, at 8½ o'clock. All are invited.

—Real estate business is quite active.

—Sneezing colds are very fashionable.

—Mittens have appeared in the shop windows.

—Large quantities of shingles are brought into town daily.

—Stoves are being set up in great numbers, and the wood and coal market remains lively.

—Gov. Perham is on an official visit of inspection to the Swedish colony in Aroostook. He will be absent some two weeks.

—Farmers are becoming practical chiropodists this week, and are doing a slashing business cutting corn.

—The Piscataquis Observer says; "The B. & P. Railroad has been put in condition to run the regular trains at the rate of forty miles an hour."

—A big excavation at the junction of Hammond and Court streets is a sewer indication that the drainage of that section is to be improved.

—Ensign Sumner C. Paine, U. S. Navy, son of Seth Paine, Esq., of this city, has been ordered to the frigate Wabash, now fitting out in Boston as flag-ship of the European fleet.

—John Hayes who keeps on Central bridge is not the man who was reported yesterday as engaging in a fight near the boom house. He is by no means a "fighting character," as all who know him will attest.

—A veteran of the First Maine Heavy Artillery writes us from Dwight, Ill., regretting that notice of the annual reunion of the regiment was not given sufficiently early to allow him and others residing at a distance to attend.

—Mr. Taylor Durgin has left at this office a natural curiosity in the shape of a large potato, in which two smaller ones have grown. The large tuber is a year older than the smaller, which grew from two "eyes," while in a barrel among other potatoes.

—In place of the Pullman parlor car "Saturn" which was badly damaged in the Hampden bridge disaster, a new car named the "Adirondack" has been lately put on the route between Boston and this city. Mr. Frank Hilton is conductor.

—We are indebted to Mr. Crosby Clements for a generous donation of his famous seedling potato, the "Kenduskeag." These potatoes are the result of a union of the "Oronos" and "Sebec Earlies" in the seed-ball, and are wonderfully prolific.

LIST OF PATENTS—issued to Maine inventors for the week ending Sept. 19th, 1871, and each bearing that date. Reported for the Whig & Courier by Wm. F. Sewey, Solicitor of Patents, Schwartz Block, Bangor:—

No. 119,016—James Dunning, Bangor, Ice Preserver.

No. 119,016—George F. Evans, Norway, Shears.

No. 119,020—W. R. Evans, Thomaston, Gun Lock.

No. 119,021—G. F. Fling, Portland, Heel.

No. 119,125—N. Crockett, Portland, Washing Machine.

Whole number of Patents issued for the week, 214, together with 9 Re-issues, 0 Extension, 9 Designs, and 4 Trade-marks.

ATTEMPTED ROBBERY. We learn that about 11 o'clock last Monday forenoon, as Elder Williams of Oldtown was riding alone, beyond Mann's hill on the Ellsworth road, he met two men, one of whom had a bundle on his shoulder. One of them stopped and put his hand in his pocket jumped to the horse's head, and said "Hold on and deliver." Elder Williams, who had his whip in his hand, struck his horse a sharp blow, the animal leaped suddenly, and the shaft struck the man at the horse's head, turning him round and throwing him off his balance. The other man jumped to get hold of the wagon, but the horse went off at such speed that neither he nor his companion could gain any advantage.

DEATH OF CHARLES COBB. The telegraph informs us that Charles Cobb, Esq. of Bath, died at Moose River, on the Upper Kennebec, on Wednesday of this week. For several years Mr. Cobb was a resident of this city, a printer, and a portion of that time was publisher of the Farmer & Mechanic. Failing to make it a business remunerative here, he went to Boston, where he worked for several years at his trade and then located at Bath, where he became the editor and publisher of a paper, but subsequently relinquished it for the more lucrative occupations of bookseller and news agent. At the time of his death he was Custom House officer at Moose River, where he had been stationed for several years. He enjoyed the respect and esteem of all who knew him, and his loss will be deeply felt by a large circle of relatives and friends. He was about 57 years of age.

PENOBSCOT MUSICAL ASSOCIATION It is expected that in addition to the opportunity of securing the able instruction imparted by Dr. Southard at the session commencing next week, more than usual variety will be given at the matinees and concerts, in songs, duetts, concerted pieces and choruses. The Oratorio, by Rossini, is very brilliant. Two principal sopranos, two tenors, and two basses, have prominent parts, either in solos, duetts, trios, or quartettes, and their concerted pieces are often accompanied subordinately by the Chorus. The part of *Nicanle* is taken by Mrs. Smith, the Queen by Mrs. Crowell *Osiris* by Mr. W. J. Winch, *Aaron* by Mr. F. C. Packard, *Pharaoh* by Mr. J. F. Winch, and *Moses* By Mr. F. D. Sprague. A rehearsal of these together, was had in Boston, last week, and Dr. Southard and others pronounce it very successful, in every respect. The accompaniment by the Mendelssohn Quintette Club will be very pleasing. Tickets may be secured at Duren's Bookstore to-day, and on Monday, until 7 o'clock, p. m., when they may be procured at the ticket office in Norombega Hall. A rehearsal will be held on Monday evening, 7½ o'clock, in the hall.

NEW ROTARY STEAM ENGINE. The new rotary steam engine invented by Mr. Leach and improved by Mr. Schwartz, is now running at the last named engineer's foundry on Harlow street, and excites a great deal of attention from mechanics and people interested in steam engines, as well as the general public. To describe it in terms intelligible to those of our readers not acquainted with machinery, is a task we can hardly undertake with a hope of success; still we may give a general idea of it. As is well-known to those who have taken the trouble to look at one, an ordinary steam engine is worked by the admission of steam into a cylinder, at each end alternately, forcing a piston-head backward and forward, and this reciprocating motion is changed to a circular motion by the attachment of the outer end of the piston rod to a crank. In this kind of an engine, there are two "dead" points or "centres," where the crank is in line with the piston-rod, and where the steam can exert no force, being shut off. To carry the crank over these "centres," heavy driving wheels are attached to the crank-shaft, the momentum, or aggregated rest on of which carries the crank by, and starts the piston-rod on its return movement. This of course wastes the power to a great extent. In the new rotary engine at Mr. Schwartz's foundry, there is no return motion—the cylinder is endless, being circular, and the steam is always behind the piston-head, pushing it in one direction alone, on something the same principle as water operates on an overshot wheel. The shaft to which the motion is communicated, is the centre around the which the circular or endless cylinder is curved, which, it will be seen, makes the machine very compact, so that it occupies but about one-third the space of an ordinary engine. The valves in the cylinder, the cut-off, and all the arrangement for the admission and of the exhaust of the steam, can only be understood by a personal examination, which Mr. Leach will be happy to afford to all who will take the trouble to visit the foundry. Economy of space, power and fuel is claimed for this over all other engines, and the claim appears to be fully substantiated. Mr. Leach is preparing the plans for a steam engine of 30-horse power, on the new principle, which Mr. Schwartz will proceed to build at once.

PENOBSCOT AGRICULTURAL SOCIETY.

ANNUAL EXHIBITION AND FAIR—THIRD DAY.

Yesterday the large attendance on the Fair Grounds proved beyond a doubt that this has been the most successful Fair held in Bangor for years. A crowd was present in the forenoon but in the afternoon there was a general rush from the city, and the tent, the grand stand, and the grounds adjacent to the home stretch and Judge's stand, were jammed with humanity.

A general exhibition of the horses entered for premiums was given in the forenoon, and the purse for 4-years old colts was won by "Comet," entered by James Farnham, he beating a colt entered by H. Pratt in

FIRE-PROOF

LAMP CHIMNEYS.

THESE CHIMNEYS we can now offer to the trade as the most perfect article ever offered to the public to possess all the essentials of a good reliable Chimney. They are well made, from superior quality of glass even shaped and smoothly in the bottom and bulb, fully annealed and tested will not break from the heat of the hottest burning lamp.

A trial of their merits will convince the consumer that although costing a trifle more than the ordinary class of Chimneys it is the cheapest in the end, as a saving of untold trouble and annoyance and a prevention of many accidents hitherto resulting from the breakage of Chimneys in burning lights.

Dental Card.

I wish to say a word to the Gentlemen and Ladies of Bangor and vicinity As parents you invest no more [illegible] your children than for yourselves A gentleman in Bangor, who is fifty years old, was in my room in April and said that he would give me one hundred dollars if I would save one tooth in his head without extracting it But he was too late If a man will thus value one tooth what should be done for his children.

Now if you cannot save your own you can save the teeth of your children Almost every day some father or mother will come to the office with some near child to have me extract some aching tooth I examine the mouth and find that the painful tooth is not [illegible] but a per manent tooth I am astonished surprised you are wrong she has never had but one tooth there also will certainly have a permanent set when this one is out of the way

As I realize a portion of our patrons have never had any dental education, that in consequence their teeth [illegible] decayed teeth And that all teeth last grow [illegible] if the twenty are permanent ones, thirty two all I have extracted within the past year, seven [illegible] teeth for one little girl who was not eleven years old Will you parents suffer your children to [illegible] life time by your neglect? If by neglect you have lost your natural teeth a good substitute will [illegible] you where to go for the best artificial teeth at the lowest rates

Mrs Laura D Fair has put in conspicuous places in her prison quarters the cards of nearly all of her feminine sympathizers who have called on her since she murdered Judge Crittenden She boasts it is said of having more of the sympathy of San Francisco than any woman in the whole city

75,000 Acres

OF GOOD

Timber Land

For Sale at a Low Rate,

Situated on Moose River, in the town of Greig, Lewis County New York

Said timber consisting of White Hemlock, Spruce, Pine and Hardwood The subscribers own two large tracts located on the aforesaid river, which will consume the hemlock bark, thus enabling the land and timber to be purchased at a comparatively cheap rate. The timber is excellent in quality in all particulars The aforesaid tract of land is easy of access being only from six to fifteen miles from both the Black River R R and Black River Canal, which land direct to the Albany Market. The land is comparatively level, well watered and good for farming purposes. Moose River, which surrounds three sides of tract, is a large stream and empties into Black River, where the aforesaid Canal leads into Black River At this point or junction of the rivers, is a fall of sixty (60) feet over which the waters of both rivers flow, thus forming an unlimited water power, two might say right in the Canal and at the Depot, to which Moose River will carry the immense amount of timber from a thousand acres of land

Any parties desiring to examine and purchase timber will do well to give this a opportunity their attention. The land and timber can be purchased at a cheap rate or the timber also separated.
